

QUALITY, ENVIRONMENTAL AND SAFETY POLICY

Elastomer Solutions Group is dedicated to development, production and selling of technical rubber parts and assumes Quality as the basis for its business. As a development partner for the automotive industry and its suppliers, the organization gives preference to win-win relationships seeking for a continuous efficiency growth. This objective is achieved by:

- Guarantying the accomplishment of specifications, standards, legal/interested parties requirements and contractual conditions;
- Trying to exceed customer and other interested parties expectations;
- Valuing human resources, consolidating competences and reinforcing continuously the organization values;
- Increasing market share;
- Industrializing new products using a reduced time-to-market approach, developing robust processes that are efficient, effective and adequate to environment protection.
- Respecting environment and develop work conditions in accordance to health and safety regulations, using the best available technology;
- Continuously improving:
 - Management system effectiveness;
 - Environmental performance by avoiding waste, minimizing production of rubber waste and effluents, giving priority to waste valorisation and rationalizing water and energy consumption.
 - Quality of products, reducing cost and increasing productivity – increasing value for money;

This Policy is the driver of our organization and can only be implemented with all employees and other interested parties involvement.
